

With the Xitracs Catalog Publisher Add-On™ it's easy to publish your institution's course catalog to a website. Courses can be listed by school, department and semester and can include links to course and course section syllabi. In addition, each course section lists the teaching faculty and can optionally include a link to the respective faculty CV.

- **Put your course catalog on the web easily**
 - Courses by semester
 - Course description
 - Syllabi
 - Faculty
 - CVs
- **One-click publishing**
- **Customized template to match institution style**

This Xitracs Add-On™ integrates directly with the Xitracs Credentials system, so you can use all the existing catalog and faculty information—no need to re-enter. Setting up a website location is quick and easy and Concord can customize a template so the resulting catalog can match the look-and-feel you want. When you are ready to publish, select the semester(s) to be included and click—it's that simple. Now students and other stakeholders can view your course catalog over the web.

Course and course section syllabi can be included to enhance the level of information available to students and accreditation agency reviewers. In addition, teaching faculty CVs can be added to the catalog.

This feature is just one more way Xitracs can make it easier to support your accreditation process and conform to any open records requirements your state may demand.

For more information about the Xitracs Catalog Publisher Add-On™ and the complete Xitracs Accreditation Management System™ please contact your Concord representative.
