

Xitracs Programs™ provides you with a simple and budget conscious solution to the collection and reporting of program information in support of the accreditation process.

- **Easily collect responses**
  - Flexible fields to fit your methodology
  - Portal integration for easy access
- **Search across programs**
  - Quick reporting by keyword, field or cycle
- **Summary snapshots**
  - View progress with a click
- **Link programs and plans**
  - Bring goals, plans and programs together

Xitracs Programs™ is all about making life simpler for everyone involved in the review process, while providing the tools and reports you need to manage the process effectively. You can even link your programs to the integrated Xitracs Planning module—it's easy!

Faculty and staff can quickly and easily review and update their programs with responses to fields you can define to fit your institution's needs, such as *Objectives, Goals, Outcomes and Reflection, etc.* The response input screens are intuitive and simple. No complex training or workshops needed here.

- **Simple curriculum mapping**
  - On-screen mapping makes it easy
  - Map to program or general outcomes
- **Link outcomes to courses**
  - Include course and syllabi information
- **Easy reporting**
  - Print mapping reports with a click

A flexible form-set feature allows you to define the response fields that match your institution's terminology for program reviews. You can set your own cycle dates and control when responses can be edited.

You can customize form-sets to fit the needs of specific programs. Responses from earlier cycles can be copied forward with a click.

A simple curriculum mapping tool lets you create maps quickly, then link them to program outcomes and courses. Integration with the Xitracs Credentials module means that course and section syllabi can also be linked. The resulting map reports can be generated easily.

A Management Snapshot feature and built-in progress tracking lets you and portal users see your progress. Program reports can be previewed at any time or published in web or PDF formats with a click. Output to MS Excel® format is also available to support further downstream data analysis and reporting.
